Renea:

Thank you again for setting up our meeting Wednesday.

We want to get you a few more documents that were discussed at that meeting or relate to issues discussed. They are attached.

We will also send separately excerpts from recent depositions with testimony or positions of TCEQ or the Port that were referenced or supports what we stated on Wednesday.

Renea:

Attached is a document we propose to use for the discussions on Wednesday at 11:30. It has an overview, the request we are making of EPA, and discussions and documents that provide some of the bases for the statements in the overview and ask.

We will provide any other documents or information you or others there would like to have.

Please let me know if you have any questions about these matters.

Rick
